Installation & Login

Install the app located on either: Google play or the App store

Open the app once download is complete

Once the app is open:

Click the **"Gear"** icon located in the top left corner of the home screen.

Click **"Sign in or Create an account"**

Email:

The email you provided us with

Password: allure

Password:

We ask you **DO NOT** change the password due to servicing purposes

2 Connect Device(s)

Once logged into your account, you will need to connect the device(s):

Click the "+" icon located in the top right of your home screen

Click "Add New Devices"

Add New Devices

Device(s) should auto-populate: Click the device you want to add.

Unable to see the device(s)? please see the Troubleshooting pg. section:***

Connect your device to wifi

Enter your **wifi password**

Click "Confirm"

Others...

Don't see your wifi listed?

Click "Others..." to manually enter your wifi.

Custom_User_Name

Now you will be **prompted to name the device:** (eg. Backyard lights, Frontyard lights, etc.)

DONE

Click "Done"

Want to Rename your device?

Click and hold on the device until a menu pops up. This is where you can add your device to a group (see step 3), or "Rename" the device.

You should now be able to see your newly added device(s) on your home screen

Note: if you logout of your account, you may need to "Reset" and reconnect to your device(s).

Device & Groups

3

Now that your device or device's have been connected; there will be sections ("Device" and "Group") available for controlling your lights:

Device: Controls lights by their individual devices

Group: Controls all lights and devices simultaneously

Note: if you have multiple devices, select the "Groups" "All Devices" option

Click the "Device" or "Group" you want to control, move onto step 4.

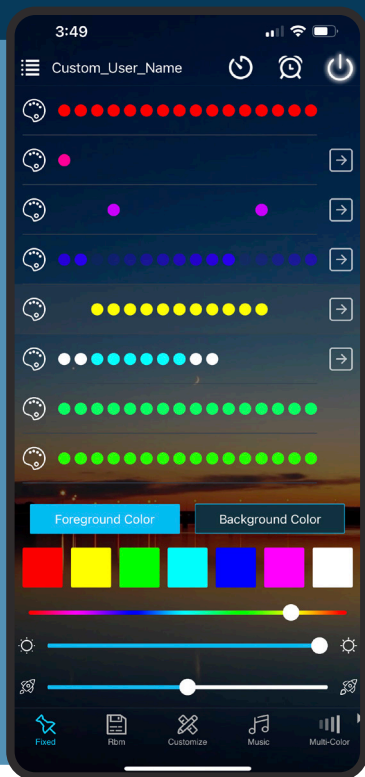

4 Colour Controls

Fixed

Once you've selected either the "Device" or "Group"

The "**fixed**" screen will appear: This is where you can customize colours, speed, direction, timer, delay ON/OFF, and intensity.

Delay ON/OFF lights:

Delay your lights to come ON by: 10 sec, 30 sec, 2 min, 5 min, 10 min, 30 min, and 1 hr

Timer:

Set an automated timer for your lights to turn ON and OFF,

ON/OFF switch:

Turn your lights ON and OFF with the power icon

Direction:

Change the direction of the pattern movement: left to right, or right to left.

Set lights to display **1 colour**, select only: Foreground Color

Set lights to display **2 colours**, select a colour for both

Foreground Color and Background Color

Brightness/Intensity:

Control the brightness/intensity of your lights with the sun icon slider

Speed:

Control the speed of your lights with the rocketship icon slider.

Try it yourself!

Choose two colours, one being a moving foreground colour, and the other being a still background colour – watch your lights dance! You can also leave the background colour off; this will then only display the moving foreground colour.

Rbm: Preset Patterns

5

To select a preset pattern, click on the "**Rbm**" icon located in the bottom toolbar next to the "**Fixed**" icon.

The app comes with 227 preset patterns ranging from: Christmas, Halloween, Valentines, St. Patrick's Day, Canada Day, Architectural lighting, and MORE...

Delay ON/OFF lights: See pg. 3 Step:5 for details

Timer: See pg. 3 Step:5 for details

ON/OFF switch: See pg. 3 Step:5 for details

Move the **"colour wheel"** left or right to change the pattern of your lights

Found a pattern you like and want to save it for future use?

While on the pattern of choice, click the **"heart"** icon to save it to your favorites library.

1

Now you can quickly access this pattern by clicking on the **"number"**

Brightness/Intensity: See pg. 3 Step:5 for details

Speed: See pg. 3 Step:5 for details

Customize Patterns

6

To customize your own pattern, click on the **"Customize"** icon located in the bottom toolbar next to the **"Rbm"** icon.

Click the **"Plus"** icon to add a new custom pattern

Click **"Add Steps"** **Add Steps**

Click **"Please choose"** or the arrow **Please choose**

5

Customize pattern:

Effects by Modes

Choose a different effect

Speed 50%

Adjust the effects speed

Confirm

Save your new effect/pattern

Foreground Color

For single colour pattern:

100%

Select "Foreground Colour"

Background Color

For dual colour pattern:

0%

Select "Background Colour"

4

Select an effect

Note: stay to the outside of the colour wheel for the most vivid colour(s).

6

Give your new pattern a **"Name"**
"Save" your new pattern

Save

Delay ON/OFF lights: See pg. 3 Step:5 for details

Timer: See pg. 3 Step:5 for details

ON/OFF switch: See pg. 3 Step:5 for details

Edit pattern: Click the 3 dots on the pattern you want to edit

Music Feature

Connect your music to your lights and watch them dance along to the rhythm of your tunes.

Light Screen Mode

LED Strip Mode

Swipe **left** or **right** to change the pattern effect

Click the **"Play"** button to start the pattern

Note: in **"App Microphone"** mode, the music will play off the speakers on your phone

Adjust the **"Brightness"**

Adjust the **"Sensitivity"**

Choose a **"Falling Color"**

The falling colour will be the trailing colour in the pattern

When set to:

"Device Microphone" mode; this will allow you to play your music (eg. on a speaker) while the microphone on your phone listens to the rhythm.

All the other controls are the same as above.

8 multi-colour

The "Multi-Colour" section allows you to set your lights to a preset pattern, and customize the colours.

Choose a pattern:

Moving patterns:

Running Water, Strobe, Jump, Breathing, etc.

Still patterns: Static

To modify the colours:

Click the three dots

Choose "Modify"

"Equally Distribute" your pattern colours with:

Equally distributed

Want to add a new colour?

Scroll down to the bottom of the "Modify" page, and click "New Color".

New Color

"Garbage" icon deletes the colour.

Adjust the position of your colours by using the slider, or "-" and "+" icons

Modify the colour by clicking on the colour:

For moving patterns: All the controls are the same. The only difference is that you're able to adjust the speed of the pattern.

Pattern Positions:

Camera Colour Match

9

Set your lights to match a colour in your surroundings with the "Camera" mode:

For both "Manual" and "Auto" mode:

Note: you will need to give the app permission to access to your camera in order to use this feature.

Manual

Auto

"Manual" mode allows you to manually "Capture" the colour.

Capture color

Click "**Capture color**" when you've found the colour you want to display.

"Auto" mode will capture the colour automatically.

Note: if you want the colour to stay, we recommend using the "**Manual**" mode.

10 Warm: True Soft White

Your Allure lights feature our unique soft white capabilities. This feature can be found in **"WARM"** mode:

Warmth percentage(%)

0% warmth

100% warmth

Manually adjust the warmth % by moving your finger around the wheel

Save the warmth % for future use:

Find the % tone you want

Click and hold one of the **"DIY"** buttons

Now your tone is saved for quick access

Set a Timer

Set a "Timer" for your lights to turn ON and OFF automatically:

Set a "Timer":

Click the **"Alarm Clock"** icon (located in the top right of every "Colour Control" pages)

Note: you will need to set both an ON and OFF "Timer" for your lights

Set ON or OFF Timer for lights:

1. Click **"Add Timer"** or the **"+"** icon

2. Click **"Time"**

Time
6:46 PM

Select a time for your lights to turn **ON** or **OFF**

3. Select the days to **"Repeat"** your timer

Lights ON: ☒

Lights OFF: ☐

4. Click the **"ON/"**
OFF" toggle to

4. **DO NOT** click the
toggle (grey/OFF)

Lights ON: ☒

5. Select a **"Mode"**

Save

Click **"Save"** in the top right corner to save your timer

COLORS

FUNCTIONS

"COLORS": Single colour:
ability to adjust **Brightness**

"FUNCTION": 227 preset patterns from **"Rbm"** (Mode # correlates to the pattern # in Rbm): ability to adjust **"Brightness"** and **"Speed"**

You should now be able to see your ON and OFF timers.

Toggle ON (blue) indicates the timer is active (ON)

Toggle OFF (grey) indicates the timer is inactive (OFF)

To “Modify” or “Delete” a timer:

Click and Hold the timer for 2 seconds that you want to “Modify” or “Delete”

A menu will appear from the bottom:

Select either “**Modify**” or “**Delete**”

Trouble Shooting

Offline mode:

1. Check the power connection. (Green and Red light should be ON).

If **YES**: try resetting your device (see section 2 on how to RESET your device.

If **NO**:

2. Make sure the soffit plug(s) are connected, and the switch is in the **ON** position.

3. **UNPLUG** or turn the switch **OFF** for **10 seconds**, then plug back-in/turn switch **ON**.

4. In the **LiteWRX** App: **Pull down on the screen to refresh**- Lights should come back “**Online**”

RESET the device(s):

To reset device(s):

1. Hold the “RESET” button down for 10 seconds on the device (or until the blue light flashes).

You should now be able to connect to your device(s). (Please see Step 2, pg. 2, for help connecting your device(s)).

If you are still unable to see your device(s) please contact us.

Timers not working?

1. Delete the timer(s) (see section 12, pg. 8, for help deleting timers).

2. Unplug/ turn the switch off for 10 seconds then plug back/ switch on.

3. Pull down on the screen to refresh.

4. Read the timers.

Colors washed out with white?

1. Go to the “WARM” Page in your colour controls.

1. Click on the black circle to get 0% to bring the color back (see section 11, pg. 7, for help with this)

Blue lights?

Contact us to change the light (light has gone bad)
